

CembrOzone

Compact water treatment for generating potable and process water without chemicals

Properties:

- Ideal for direct treatment of surface water, well water and treated wastewater
- Combined filtration and disinfection through ozonisation and ultrafiltration
- High level of decontamination up to 8 log levels
- Removal of solids, trace substances, manganese, iron and arsenic from water
- High recovery rate (98–99%)
- Low energy consumption (0.2 kWh/m³)
- Long-lasting membranes for sustainable operation
- Safe, chemical-free process
- Space-saving modular design in the EnviModul technology container
- High level of automation for reliable operation
